Professional Summary

Aspiring Product Manager with hands-on experience in business analysis, process optimization, and building user-centric solutions across government and e-commerce domains. Skilled in translating business needs into structured requirements, improving workflows, and driving data-informed decisions. Experienced in stakeholder management, product documentation, and developing solutions that enhance efficiency and user outcomes.

Education

Amity University, Master of Business Administration in BA	Jan 2026 – Jan 2028
A.K.T.U, Bachelor's of Technology in IT	Dec 2020 – June 2024

Experience

Business Analyst , Webority Technologies – Gurgaon, IN	Aug 2025 – Present
---	--------------------

- Managing multiple end-to-end **projects across government and e-commerce domains**, ensuring alignment between business requirements and technical delivery.
- Analyzing tender requirements in detail and translating them into structured documentation (**BRDs/FRDs**) along with solution-oriented prototypes tailored to client needs.
- Introduced a prototype-driven approach for tender submissions (in addition to documentation), **improving solution clarity and contributing to 20% increase in bid win rate**.
- Collaborating with cross-functional teams to define workflows, resolve requirement gaps, and ensure smooth execution across project lifecycles.
- Driving stakeholder communication and supporting sprint planning, milestone tracking, and delivery alignment.
- **Projects:** Forget It, SAMAR-DRDO, Cyson, BEE-Ministry of Power, THDC, Lea Clothing and VMMC-Safdarjung.

Associate Moderator , Tech Mahindra – Noida, IN	Sep 2024 – Aug 2025
--	---------------------

- Moderated and validated **AI-generated content for Google's Gemini project**, ensuring high-quality, policy-compliant outputs at scale.
- **Improved content accuracy and reduced turnaround time** by consistently maintaining high precision in prompt evaluation and decision-making.
- **Collaborated with clients and vendor** teams to streamline moderation workflows and enhance reporting clarity, leading to better process alignment.
- Identified recurring content issues and contributed to process improvements for better quality control and consistency in AI outputs.

QA Intern , Decision Point Analytics – Gurgaon, IN	Nov 2023 – Feb 2024
---	---------------------

- Contributed to the **development of Beagle GPT, an enterprise AI-powered insights tool**, by working across documentation, testing, and user experience flows.
- Created comprehensive **internal and external documentation**, including user guides, onboarding materials, and feature explanations to improve product adoption and clarity.
- Collaborated with **product and data teams** to understand requirements and translate them into structured user flows and documentation artifacts.
- Performed **end-to-end testing of chatbot interfaces and data modules**, validating functionality, improving usability, and ensuring accurate system responses.
